JAEMACOM Silent Alarm

Connected Security at the Workplace

Workplace violence is a phenomenon that has significantly increased across the EU over the last few years. Time and again, company employees continue to be harassed and threatened by individuals or groups from outside the company.

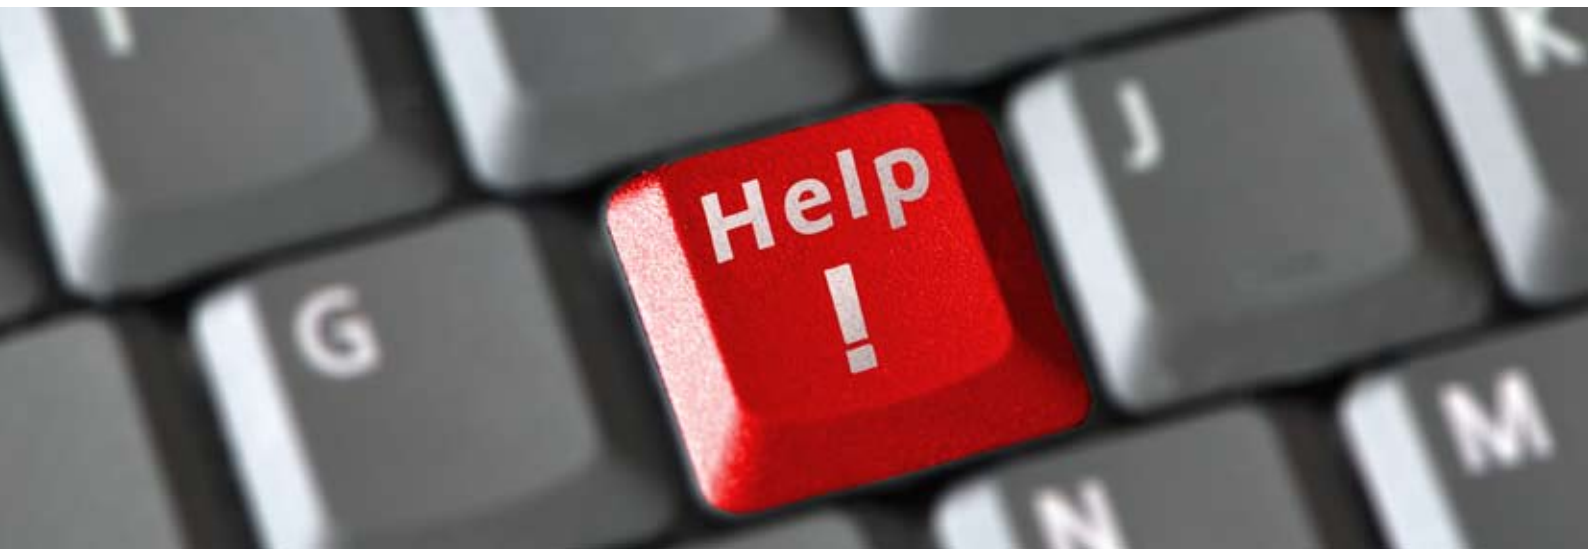

In order to combat this problem effectively, JAEMACOM and ITDZ Berlin have

developed a special alarm software. With this software, a targeted employee can quickly and easily alert colleagues or relevant security services in critical situations. After starting the computer, the alarm software is automatically activated and continues to run in the background.

When an alarm is activated, either by clicking on a desktop icon, or using a spe-

cific keyboard combination, all relevant employees receive a warning on their screens with the exception of the employees in the same room as the alarm activator. This way the alarm ultimately remains "silent".

Adjustments and administration of the system can at all times be very easily applied to the secure administration panel.

Your Benefits

- **Easy to Operate**
This way the security in your company and that of your employees is significantly increased.
- **Highly Flexible**
The technical layout of the system with its high flexibility allows integration of the software into existing networks with little effort.
- **Discrete Alarm Activation**
Avoid attracting unnecessary attention, allowing critical situations to be resolved easier. This way the software contributes to a deescalation of the situation.
- **Individual Configuration**
Through the secure admin-domain the software can be adapted to every situation and environment

Technical Details

- Based on Microsoft.net
- Optimised for every Microsoft and Citrix terminal server environment
- Suited for every Microsoft windows version
- Configuration in MS SQL server database

Licensing Costs

- Small Edition: from €1,500 (15 clients + €300 support)
- Medium Edition: from €2,000 (50 clients + €400 support)
- Corporate Edition: from €2,900 (100 clients + €580 support)
